ARTICLES

Biochemical and Molecular Roles of Nutrients

Apolipoprotein mRNA in Liver and Intestine of Rats Is Affected by Dietary Beet Fiber or Cholestyramine. *Kei Sonoyama, Hiroyuki Nishikawa, Shuhachi Kiriyama and Ryoya Niki* 13
Overt Vitamin B-6 Deficiency Affects Rat Pancreatic Digestive Enzyme and Glutathione Reductase Activities. *Michael A. Dubick, Denise Gretz and Adhip P. N. Majumdar* 20
Connective Tissue Integrity Is Lost in Vitamin B-6–Deficient Chicks. *Priscille G. Massé, Mitsuo Yamauchi, James D. Mahuren, Stephen P. Coburn, Ofelia E. Muniz and David S. Howell* 26
Hypercholesterolemia Induced by Cholesterol- or Cystine-Enriched Diets Is Characterized by Different Plasma Lipoprotein and Apolipoprotein Concentrations in Rats. *Colette Sérougne, Catherine Felgines, Jacqueline Férézou, Tahar Hajri, Catherine Bertin and Andrzej Mazur* 35
A Dietary Nucleoside-Nucleotide Mixture Inhibits Endotoxin-Induced Bacterial Translocation in Mice Fed Protein-Free Diet. *Andrew A. Adjei and Shigeru Yamamoto* 42
Dietary Fat and Fiber Alter Rat Colonic Protein Kinase C Isozyme Expression. *Laurie A. Davidson, Joanne R. Lupton, Yi-Hai Jiang, Wen-Chi Chang, Harold M. Aukema and Robert S. Chapkin* 49

Community and International Nutrition

Potential for Misclassification of Infants' Usual Feeding Practices Using 24-Hour Dietary Assessment Methods. *Ellen G. Piwoz, Hilary Creed de Kanashiro, Guillermo Lopez De Romaña, Robert E. Black and Kenneth H. Brown* 57

Human and Clinical Nutrition

Zinc Status Is Not Adversely Affected by Folic Acid Supplementation and Zinc Intake Does Not Impair Folate Utilization in Human Subjects. *Gail P. A. Kauwell, Lynn B. Bailey, Jesse F. Gregory III, Dan W. Bowling and Robert J. Cousins* 66

Nutrient Metabolism

Palmitic Acid Is Absorbed as *sn*-2 Monopalmitin from Milk and Formula with Rearranged Triacylglycerols and Results in Increased Plasma Triglyceride *sn*-2 and Cholesteryl Ester Palmitate in Piglets. *Shelia M. Innis, Roger Dyer, Paul Quinlan and Deborah Diersen-Schade* 73
True Absorption and Retention of Supplemental Iron Is More Efficient When Iron Is Administered Every Three Days Rather than Daily to Iron-Normal and Iron-Deficient Rats. *Fernando E. Viteri, Liu Xunian, Karen Tolomei and Antonio Martín* 82
Production of Large Amounts of [^{13}C]Leucine-Enriched Milk Proteins by Lactating Cows. *Yves Boirie, Jacques Fauquant, Henri Rulquin, Jean-Louis Maubois and Bernard Beaufrère* 92
Folate Catabolism Is Related to Growth Rate in Weanling Rats. *Helene McNulty, Joseph M. McPartlin, Donald G. Weir and John M. Scott* 99

Cholecalciferol 25-Hydroxylation Is Similar in Liver Microsomes from Male and Female Rats When Cholecalciferol Concentration Is Low. *Myrtle Thierry-Palmer, Almena L. Free, Periakaruppan R. Nagappan and Angela R. Butler* 104
Early Treatment of Obese (*ob/ob*) Mice with Triiodothyronine Increases Oxidative Metabolism in Muscle by Not in Brown Adipose Tissue or Liver. *Soomee S. Oh and Murray L. Kaplan* 112
Nutrient Uptake by the Hindlimb of Growing Pigs Treated with Porcine Somatotropin and Insulin. *Diane Wray-Cahen, Alan W. Bell, R. Dean Boyd, Deborah A. Ross, Dale E. Bauman, Beatrice J. Krick and Robert J. Harrell* 125

Nutrient Requirements and Interactions

Endogenous Amino Nitrogen Collected from Pigs with End-to-End Ileorectal Anastomosis Is Affected by the Method of Estimation and Altered by Dietary Fiber. *Gerardo Mariscal-Landín, Bernard Sève, Yvon Colléaux and Yves Lebreton* 136

Nutrition, Pharmacology and Toxicology

Fish Oil Enhances Pentachlorobenzene Metabolism and Reduces Its Accumulation in Rats. *Keizo Umegaki, Sachie Ikegami and Tomio Ichikawa* 147

Announcements 154

No. 2 FEBRUARY 1995

HISTORY OF NUTRITION

Eijkman's Contribution to the Discovery of Vitamins. *Kenneth J. Carpenter and Barbara Sutherland* .. 155

ARTICLES

Biochemical and Molecular Roles of Nutrients

A Fructose-Rich Diet Decreases Insulin-Stimulated Glucose Incorporation into Lipids but Not Glucose Transport in Adipocytes of Normal and Diabetic Rats. *Jing Luo, Salwa W. Rizkalla, Muriel Lerer-Metzger, Josette Boillot, Anca Ardeleanu, Françoise Bruzzo, Annie Chevalier and Gérard Slama* 164
Apolipoprotein A-I Synthesis and Secretion Are Increased in Hep G2 Cells Depleted of Copper by Cu-pruretic Tetramine. *Jin J. Zhang, Yisheng Wang and Kai Y. Lei* 172
Investigations into the Actions of Glucose-Dependent Insulinotropic Polypeptide and Glucagon-Like Peptide-1(7–36)amide on Lipoprotein Lipase Activity in Explants of Rat Adipose Tissue. *Jacqueline M. E. Knapper, Sarah M. Puddicombe, Linda M. Morgan and John M. Fletcher* 183
The Thiamine-Dependent Hysteretic Behavior of Human Transketolase: Implications for Thiamine Deficiency. *Charles K. Singleton, Stevan R. Pekovich, Brian A. McCool and Peter R. Martin* 189
Activities of Antioxidant Enzymes in Various Tissues of Male Fischer 344 Rats Are Altered by Food Restriction. *Erning Xia, Govinda Rao, Holly Van Remmen, Ahmad R. Heydari and Arlan Richardson* 195

Community and International Nutrition

Viatmin A Supplementation Does Not Improve Growth of Preschool Children. A Randomized, Double-Blind Field Trial in South India. *Usha Ramakrishnan, Michael C. Latham and Rajaratnam Abel* 202

Human and Clinical Nutrition

A Vegetarian Diet Rich in Soybean Products Compromises Iron Status in Young Students. *Ning-Sing Shaw, Chia-Jung Chin and Wen-Harn Pan* 212
Closed-Loop Control of Carbon Dioxide Concentration and Pressure Improves Response of Room Respiration Calorimeters. *Jon K. Moon, Firoz A. Vohra, Omar S. Valerio Jimenez, Maurice R. Puyau and Nancy F. Butte* 220

Nutrient Metabolism

The Positional Distribution of Fatty Acids in Palm Oil and Lard Influences Their Biologic Effects in Rats. *Serge C. Renaud, Jean C. Ruf and Dominique Petithory* 229
Carnitine Affects Octanoate Oxidation to Carbon Dioxide and Dicarboxylic Acids in Colostrum-Deprived Piglets: In Vivo Analysis of Mechanisms Involved Based on CoA- and Carnitine-Ester Profiles. *Theo A.T.G. van Kempen and Jack Odle* 238
Dietary Arginine Deficiency and Gut Ammonium Infusion Alter Flux of Urea Cycle Intermediates across the Portal-Drained Viscera of Pigs. *Ronald L. Prior and Kathy L. Gross* 251
Contribution of D-(−)-3-Hydroxybutyrate to the Energy Expenditure of Neonatal Pigs. *Mark A. Tetrick, Sean H. Adams, Jack Odle and N. J. Benevenga* 264
Dietary Fiber Increases Oxidative Metabolism in Colonocytes but Not in Distal Small Intestinal Enterocytes Isolated from Rats. *Kathleen E. Marsman and Michael I. McBurney* 273

Nutrient Requirements and Interactions

Feeding Australian Acacia Gums and Gum Arabic Leads to Non-Starch Polysaccharide Accumulation in the Cecum of Rats. *Geoffrey Annison, Rodney P. Trimble and David L. Topping* 283
Classical Selenium-Dependent Glutathione Peroxidase Expression Is Decreased Secondary to Iron Deficiency in Rats. *Patrick M. Moriarty, Mary Frances Picciano, John L. Beard and C. Channa Reddy* 293
Selenium Deficiency Alters Thyroid Hormone Metabolism in Guinea Pigs. *Paul M. Cammack, Brad A. Zwahlen and Merrill J. Christensen* 302

Announcements 309

ARTICLES

Biochemical and Molecular Roles of Nutrients

Activity of cAMP-Dependent Protein Kinase Is Reduced in Protein-Energy Malnourished Rats. *M. Rozwadowski, L. L. Stephen, P. M. Goss, T. M. Bray and L. E. Nagy* 401
Expression of Heat Shock Genes in Hepatocytes Is Affected by Age and Food Restriction in Rats. *Ahmad R. Heydari, Craig C. Conrad and Arlan Richardson* 410
Human Milk Glycosaminoglycans Inhibit HIV Glycoprotein gp120 Binding to Its Host Cell CD4 Receptor. *David S. Newburg, Robert J. Linhardt, Stephen A. Ampofo and Robert H. Yolken* 419
Dietary Monounsaturated and Polyunsaturated Fatty Acids Are Comparable in Their Effects on Hepatic Apolipoprotein mRNA Abundance and Liver Lipid Concentrations When Substituted for Saturated Fatty Acids in Cynomolgus Monkeys. *Margaret E. Brousseau, Jose M. Ordovas, Jesus Osada, Joan Fasulo, Sander J. Robins, Robert J. Nicolosi and Ernst J. Schaefer* 425
Dietary Soybean May Be Antiestrogenic in Male Mice. *Sari I. Mäkelä, Liisa H. Pylkkänen, Risto S. S. Santti and Herman Adlercreutz* 437
Uptake of Dietary Coenzyme Q Supplement Is Limited in Rats. *Yiyi Zhang, Fredrik Åberg, Eeva-Liisa Appelkvist, Gustav Dallner and Lars Ernster* 446
Cholesterol 7α-Hydroxylase Activity Is Increased by Dietary Modification with Psyllium Hydrocolloid, Pectin, Cholesterol and Cholestyramine in Rats. *Hugh B. Matheson, Ivette S. Colón and Jon A. Story* 454

Human and Clinical Nutrition

Arepas Made from High Amylose Corn Flour Produce Favorably Low Glucose and Insulin Responses in Healthy Humans. *Yvonne Granfeldt, Anders Drews and Inger Björck* 459
Lauric and Palmitic Acid-Enriched Diets Have Minimal Impact on Serum Lipid and Lipoprotein Concentrations and Glucose Metabolism in Healthy Young Women. *Ursula S. Schwab, Leo K. Niskanen, Helvi M. Maliranta, Markku J. Savolainen, Y. Antero Kesäniemi and Matti I. J. Uusitupa* 466
Iron Status Alters Murine Systemic Lupus Erythematosus. *Lorene M. Leiter, Kenneth R. Reuhl, Stanley P. Racis, Jr. and Adria R. Sherman* 474

Nutrient Metabolism

Non-Starch Polysaccharide–Degrading Enzymes Increase the Performance of Broiler Chickens Fed Wheat of Low Apparent Metabolizable Energy. *Mingan Choct, Robert J. Hughes, Rodney P. Trimble, Kris Angkanaporn and Geoffrey Annison* 485
Nutritional Modulation of the Somatotropin/Insulin-Like Growth Factor System: Response to Feed Deprivation in Lactating Cows. *Mark A. McGuire, Dale E. Bauman, Debra A. Dwyer and Wendie S. Cohick* 493
Consumption of a Glucose Diet Enhances the Sensitivity of Pancreatic Islets from Adrenalectomized Genetically Obese (*ob/ob*) Mice to Glucose-Induced Insulin Secretion. *Anahita M. Mistry, Neng-Guin Chen, Young-Soon Lee and Dale R. Romsos* 503

Albumin Synthesis Rates Measured with [$^2H_5$ring]Phenylalanine Are Not Responsive to Short-Term Intravenous Nutrients in Healthy Humans. *Peter E. Ballmer, Margaret A. McNurlan, Pia Essen, Susan E. Anderson and Peter J. Garlick* 512
Tissue Protein Turnover is Altered during Catch-Up Growth Following *Escherichia coli* Infection in Weanling Rats. *Susan E. Samuels and Vickie E. Baracos* 520
Swimming Endurance Capacity of Mice Is Increased by Chronic Consumption of Medium-Chain Triglycerides. *Tohru Fushiki, Keitaro Matsumoto, Kazuo Inoue, Teruo Kawada and Etsuro Sugimoto* .. 531
A Single Intracerebroventricular Injection of Dexamethasone Elevates Food Intake and Plasma Insulin and Depresses Metabolic Rates in Adrenalectomized Obese (*ob/ob*) Mice. *Hsiao-Linz Chen and Dale R. Romsos* 540

Nutrient Requirements and Interactions

Ration Size and Protein Intake Affect Circulating Growth Hormone Concentration, Hepatic Growth Hormone Binding and Plasma Insulin-Like Growth Factor-I Immunoreactivity in a Marine Teleost, the Gilthead Sea Bream (*Sparus aurata*). *Jaume Pérez-Sánchez, Hilario Martí-Palanca and Sadasivam J. Kaushik* 546
Very Long-Chain Fatty Acids Change the Ethanol Tolerance of *Drosophila melanogaster* Larvae. *Rebecca L. Swanson, Christine A. Baumgardner and Billy W. Geer* 553

Announcements 565

No. 3S MARCH 1995

FIRST INTERNATIONAL SYMPOSIUM ON THE ROLE OF SOY IN PREVENTING AND TREATING CHRONIC DISEASE

Introduction. *Mark Messina* v
Modern Applications for an Ancient Bean: Soybeans and the Prevention and Treatment of Chronic Disease. *Mark Messina* 567S

Overview of Soybean Processing and Products

Traditional Soyfoods: Processing and Products. *Peter Golbitz* 570S
Soy Protein Products: Processing and Use. *Edmund W. Lusas and Mian N. Riaz* 573S
Compositional Changes in Trypsin Inhibitors, Phytic Acid, Saponins and Isoflavones Related to Soybean Processing. *Robert L. Anderson and Walter J. Wolf* 581S

Soy Intake and Cholesterol Reduction

Dietary Protein, Cholesterol and Atherosclerosis: A Review of the Early History. *David Kritchevsky* .. 589S
Soy Consumption and Cholesterol Reduction: Review of Animal and Human Studies. *Kenneth K. Carroll and Elzbieta M. Kurowska* 594S
Soy and Cholesterol Reduction: Clinical Experience. *Cesare R. Sirtori, Maria R. Lovati, Cristina Manzoni, Marco Monetti, Franco Pazzucconi and Ennio Gatti* 598S

Soy and Cholesterol Reduction: Hypothesized Mechanisms

Overview of Proposed Mechanisms for the Hypocholesterolemic Effects of Soy. *Susan M. Potter* 606S
Cholesterol Synthesis and Absorption by ^2H_2O and ^{18}O-Cholesterol and Hypocholesterolemic Effect of Soy Protein. *William W. Wong, David L. Hachey, Lucinda L. Clarke and Shide Zhang* 612S
Soy Protein, Thyroid Regulation and Cholesterol Metabolism. *William A. Forsythe III* 619S

Soy and Heart Disease Prevention: Potential Mechanisms Unrelated to Cholesterol Reduction

Biology of Atherosclerotic Plaque Formation: Possible Role of Growth Factors in Lesion Development and the Potential Impact of Soy. *Elaine W. Raines and Russell Ross* 624S
Thrombotic Mechanisms in Atherosclerosis: Potential Impact of Soy Proteins. *Josiah N. Wilcox and Barbara F. Blumenthal* 631S
Protective Effects of Soy Protein on the Peroxidizability of Lipoproteins in Cerebrovascular Diseases. *Takemichi Kanazawa, Tomohiro Osanai, Xiao Shu Zhang, Tsugumichi Uemura, Xue Ze Yin, Kogo Onodera, Yasaburo Oike and Kazuyoshi Ohkubo* 639S
New Directions in Dietary Studies of Coronary Heart Disease. *Alberto Ascherio and Walter C. Willett* 647S

Potential Public Health Impact of Soy Protein

Overview: Dietary Approaches for Reducing Cardiovascular Disease Risks. *Johanna Dwyer* 656S
Incorporating Soy Proteins into Baked Products for Use in Clinical Studies. *Barbara P. Klein, Aiko K. Perry and Nancy Adair* 666S
Perspectives on Soy Protein as a Nonpharmacological Approach for Lowering Cholesterol. *Anne Carol Goldberg* 675S
Diet and Heart Disease: Health Claims. *Elizabeth A. Yetley and Youngmee K. Park* 679S

Overview of Diet and Cancer

Diet, Signal Transduction and Carcinogenesis. *Curtis L. Ashendel* 686S
An Overview of Clinical Cancer Chemoprevention Studies with Emphasis on Positive Phase III Studies. *David S. Alberts and Dava J. Garcia* 692S

Soy Intake and Cancer Risk: Animal and Epidemiologic Studies

Soy and Experimental Cancer: Animal Studies. *E. J. Hawrylewicz, Jose J. Zapata and William H. Blair* 698S
Epidemiology of Soy and Cancer: Perspectives and Directions. *Victoria Persky and Linda Van Horn* .. 709S

Nonisoflavone Soybean Anticarcinogens

Cancer Chemoprevention Agent Development Strategies for Genistein. *Vernon E. Steele, Michael A. Pereira Caroline C. Sigman and Gary J. Kelloff* 713S
Saponins as Anticarcinogens. *A. V. Rao and M-K Sung* 717S
Inositol Phosphates Have Novel Anti-Cancer Function. *Abulkalam M. Shamsuddin* 725S
The Evidence for Soybean Products as Cancer Preventive Agents. *Ann R. Kennedy* 733S
Possible Adverse Effects of Soybean Anticarcinogens. *Irvin E. Liener* 744S

Soybean Isoflavones and Cancer Risk

In Vitro Hormonal Effects of Soybean Isoflavones. *Agostino Molteni, Loredana Brizio-Molteni and Victoria Persky* 751S
Soybean Phytoestrogen Intake and Cancer Risk. *C. Herman T. Adlercreutz, Barry R. Goldin, Sherwood L. Gorbach, Krister A. V. Höckerstedt, Shaw Watanabe, Esa K. Hämäläinen, M. Helene Markkanen, Taru H. Mäkelä, Kristiina T. Wähälä, Tapio A. Hase and Theodore Fotsis* 757S
Potential Adverse Effects of Phytoestrogens. *Patricia L. Whitten, Carole Lewis, Elizabeth Russell, and Frederick Naftolin* 771S

Anticancer Effects of Genistein

Effects of Genistein on In Vitro and In Vivo Models of Cancer. *Stephen Barnes* 777S
Evaluation of the Biochemical Targets of Genistein in Tumor Cells. *Greg Peterson* 784S

Genistein, a Dietary Ingested Isoflavonoid, Inhibits Cell Proliferation and In Vitro Angiogenesis. *Theodore Fotsis, Michael Pepper, Herman Adlercreutz, Tapio Hase, Roberto Montesano and Lothar Schweigerer* 790S

Summary. *John W. Erdman, Jr.* 798S

Abstracts 799S

No. 4 APRIL 1995

ARTICLES

Biochemical and Molecular Roles of Nutrients

Dairy Proteins Protect against Dimethylhydrazine-Induced Intestinal Cancers in Rats. *Graeme H. McIntosh, Geoffrey O. Regester, Richard K. Le Leu, Peter J. Royle and Geoffrey W. Smithers* 809

A Mixture of Nucleosides and Nucleotides Increases Bone Marrow Cell and Peripheral Neutrophil Number in Mice Infected with Methicillin-Resistant *Staphylococcus aureus*. *Yoko Matsumoto, Andrew A. Adjei, Keiko Yamauchi, Mitsuo Kise, Yoko Nakasone, Yoshiyuki Shinagawa, Hiroomi Yokoyama and Shigeru Yamamoto* 817

Zinc Deficiency Causes Oxidative Damage to Proteins, Lipids and DNA in Rat Testes. *Patricia I. Oteiza, Katherine L. Olin, Cesar G. Fraga and Carl L. Keen* 823

Dietary Magnesium Supplementation Modifies Blood Pressure and Cardiovascular Function in Mineralocorticoid-Salt Hypertensive Rats but Not in Normotensive Rats. *Pascal Laurant, Jean-Pierre Kantelip and Alain Berthelot* 830

Abomasal Nitrogen Flow Affects the Relationship between Dietary Nitrogen and Insulin-Like Growth Factor-I in Growing Lambs. *Gary M. Davenport, Keith A. Cummins and Donald R. Mulvaney* 842

L-2-Oxothiazolidine-4-Carboxylate, a Cysteine Precursor, Stimulates Growth and Normalizes Tissue Glutathione Concentrations in Rats Fed a Sulfur Amino Acid-Deficient Diet. *Ajey Jain, David C. Madsen, Peter A. M. Auld, William W. Frayer, Morton K. Schwartz, Alton Meister and Johannes Mårtensson* 851

Gender, Dietary Copper and Carbohydrate Source Influence Cardiac Collagen and Lysyl Oxidase in Weanling Rats. *Moshe J. Werman, Einat Barat and Sam J. Bhathena* 857

Growth and Plasma Triiodothyronine Concentrations Are Modified by Selenium Deficiency and Repletion in Second-Generation Selenium-Deficient Rats. *Kevin M. Thompson, Helmut Haibach and Roger A. Sunde* 864

The Impaired Growth Induced by Zinc Deficiency in Rats Is Associated with Decreased Expression of the Hepatic Insulin-like Growth Factor I and Growth Hormone Receptor Genes. *Amy D. McNall, Terry D. Etherton and Gary J. Fosmire* 874

Community and International Nutrition

Twenty-Four–Hour Recall Overestimates the Dietary Intake of Malnourished Children. *Maria Teresa Anselmo Olinto, Cesar Gomes Victora, Fernando C. Barros and Denise Petrucci Gigante* 880

Growth Improvements in Children above 3 Years of Age: The Cali Study. *Rafael Pérez-Escamilla and Ernesto Pollitt* 885

School Breakfast Improves Verbal Fluency in Undernourished Jamaican Children. *Ann-Marie K. Chandler, Susan P. Walker, Kevin Connolly and Sally M. Grantham-McGregor* 894

Human and Clinical Nutrition

Patients with Anorexia Nervosa Demonstrate Deficiencies of Selected Essential Fatty Acids, Compensatory Changes in Nonessential Fatty Acids and Decreased Fluidity of Plasma Lipids. *Ralph T. Holman, Catherine E. Adams, Ralph A. Nelson, Simeon J. E. Grater, Jerzy A. Jaskiewicz, Susan B. Johnson and John W. Erdman, Jr.* 901

Nutrient Metabolism

Tumor Necrosis Factor-α Alters Maternal and Embryonic Zinc Metabolism and Is Developmentally Toxic in Mice. *Marie Weldon Taubeneck, George P. Daston, John M. Rogers, M. Eric Gershwin, Aftab Ansari and Carl L. Keen* 908
Diet-Induced Thermogenesis Is Lower in Rats Fed a Lard Diet Than in Those Fed a High Oleic Acid Safflower Oil Diet, a Safflower Oil Diet or a Linseed Oil Diet. *Hiroyuki Takeuchi, Tatsuhiro Matsuo, Kumpei Tokuyama, Yoshiharu Shimomura and Masashige Suzuki* 920
Pyridoxine-5′-β-D-Glucoside Influences the Short-Term Metabolic Utilization of Pyridoxine in Rats. *Hideko Nakano and Jesse F. Gregory III* 926
Rats Fed a Low Protein Diet Supplemented with Sulfur Amino Acids Have Increased Cysteine Dioxygenase Activity and Increased Taurine Production in Hepatocytes. *Pamela J. Bagley and Martha H. Stipanuk* 933
Biotin Accounts for Only Half of the Total Avidin-Binding Substances in Human Serum. *Donald M. Mock, Gary L. Lankford and Nell I. Mock* 941

Nutrient Requirements and Interactions

The Differences in Intestinal Viscosity Produced by Barley and β-Glucanase Alter Digesta Enzyme Activities and Ileal Nutrient Digestibilities More in Broiler Chicks than in Cocks. *Merce Almirall, Maria Francesch, Anna M. Perez-Vendrell, Joaquim Brufau and Enric Esteve-Garcia* 947
Free Amino Acids Can Replace Protein-Bound Amino Acids in Test Diets for Studies in Rainbow Trout (*Oncorhynchus mykiss*). *Markus Rodehutscord, Stefan Mandel, Michael Pack, Stephan Jacobs and Ernst Pfeffer* 956
Response of Rainbow Trout (*Oncorhynchus mykiss*) Growing from 50 to 150 g to Supplements of DL-Methionine in a Semipurified Diet Containing Low or High Levels of Cystine. *Markus Rodehutscord, Stephan Jacobs, Michael Pack and Ernst Pfeffer* 964
Response of Rainbow Trout (*Oncorhynchus mykiss*) Growing from 50 to 170 g to Supplements of Either L-Arginine or L-Threonine in a Semipurified Diet. *Markus Rodehutscord, Stephan Jacobs, Michael Pack and Ernst Pfeffer* 970
Carbohydrate Utilization and Digestibility by Tilapia, *Oreochromis niloticus* × *O. aureus*, Are Affected by Chromic Oxide Inclusion in the Diet. *Shi-Yen Shiau and Hong-Shiang Liang* 976
Nutrient Infusion into the Ileum of Rats Does Not Lower Plasma Lipids or Alter Apolipoprotein mRNA Abundance. *Suzette Middleton and Barbara O. Schneeman* 983
Dietary Calcium and Lead Interact to Modify Maternal Blood Pressure, Erythropoiesis, and Fetal and Neonatal Growth in Rats during Pregnancy and Lactation. *John D. Bogden, Francis W. Kemp, Shenggao Han, Miyuki Murphy, Mitchell Fraiman, Donald Czerniach, Carina J. Flynn, Michael L. Banua, Anthony Scimone, Lorainne Castrovilly and Sheldon B. Gertner* 990
Dietary Canola Oil Modifies Myocardial Fatty Acids and Inhibits Cardiac Arrhythmias in Rats. *Peter L. McLennan and Julie A. Dallimore* 1003
Fermentable Fibers or Oligosaccharides Reduce Urinary Nitrogen Excretion by Increasing Urea Disposal in the Rat Cecum. *Hassan Younes, Keith Garleb, Stephen Behr, Christian Rémésy and Christian Demigné* 1010
Protein-Energy Malnutrition during Gestation and Lactation in Rats Affects Growth Rate, Brain Development and Essential Fatty Acid Metabolism. *María C. Marín, María E. De Tomás, Cristina Serres and Osvaldo Mercuri* 1017

BOOK REVIEW

Nutritional Ecology of the Ruminant, Second Edition. Peter J. Van Soest. *Reviewed by Hans-Joachim G. Jung* 1025

Announcements 1026

No. 4S APRIL 1995

THE EFFECTS OF IMPROVED NUTRITION IN EARLY CHILDHOOD: THE INSTITUTE OF NUTRITION OF CENTRAL AMERICA AND PANAMA (INCAP) FOLLOW-UP STUDY

Foreword. *R. Martorell and N. S. Scrimshaw* v
History and design of the INCAP longitudinal study (1969–77) and its follow-up (1988–89). *R. Martorell, J-P. Habicht and J. A. Rivera* 1027S
Nutritional impact of supplementation in the INCAP longitudinal study: Analytic strategies and inferences. *J-P. Habicht, R. Martorell and J. A. Rivera* 1042S
Age differences in the impact of nutritional supplementation on growth. *D. G. Schroeder, R. Martorell, J. A. Rivera, M. T. Ruel and J-P. Habicht* 1051S
Patterns of linear growth in rural Guatemalan adolescents and children. *R. Martorell, D. G. Schroeder, J. A. Rivera and H. J. Kaplowitz* 1060S
Nutritional supplementation during the preschool years influences body size and composition of Guatemalan adolescents. *J. A. Rivera, R. Martorell, M. T. Ruel, J-P. Habicht and J. D. Haas* 1068S
Nutritional supplementation during the preschool years and physical work capacity in adolescent and young adult Guatemalans. *J. D. Haas, E. J. Martinez, S. Murdoch, E. Conlisk, J. A. Rivera and R. Martorell* 1078S
Age at menarche and nutritional supplementation. *A. D. Khan, D. G. Schroeder, R. Martorell and J. A. Rivera* 1090S
Early nutritional supplementation and skeletal maturation in Guatemalan adolescents. *K. E. Pickett, J. D. Haas, S. Murdoch, J. A. Rivera and R. Martorell* 1097S
Nutritional supplementation during early childhood and bone mineralization during adolescence. *L. E. Caulfield, J. H. Himes and J. A. Rivera* 1104S
Nutrition in early life and the fulfillment of intellectual potential. *E. Pollitt, K. Gorman, P. L. Engle, J. A. Rivera and R. Martorell* 1111S
Malnutrition and human function: A comparison of conclusions from the INCAP and nutrition CRSP studies. *L. H. Allen* 1119S
Results and implications of the INCAP follow-up study. *R. Martorell* 1127S

Biochemical and Molecular Roles of Nutrients

Induction of Pancreatic Growth and Proteases by Feeding a High Amino Acid Diet Does Not Depend on Cholecystokinin in Rats. *Hiroshi Hara, Hiroshi Narakino, Shuhachi Kiriyama and Takanori Kasai* 1143
High Protein Diet Has Beneficial Effects in Murine Muscular Dystrophy. *Martin M. Zdanowicz, Alfred E. Slonim, Ivan Bilaniuk, Margaret M. O'Connor, Jeff Moyse and Saul Teichberg* 1150
Physiological Doses of Oral Casein Affect Hepatic Glycogen Metabolism in Normal Food-Deprived Rats. *Mary C. Gannon and Frank Q. Nuttall* 1159

Supplemental Dietary Cystine Elevates Kidney Metallothionein in Rats by a Mechanism Involving Altered Zinc Metabolism. *Ben Shan Yang, Hiroshi Ishii, Akira Satoh and Norihisa Kato* 1167
Differential Fatty Acid Accretion in Heart, Liver and Adipose Tissues of Rats Fed Beef Tallow, Fish Oil, Olive Oil and Safflower Oils at Three Levels of Energy Intake. *Peter J. H. Jones, Brian R. Toy and Ming C. Cha* 1175
Diet and Disease Alter Phosphoinositide Composition and Metabolism in Murine Polycystic Kidneys. *Harold M. Aukema, Tamio Yamaguchi, Koji Tomobe, Diana J. Philbrick, Robert S. Chapkin, Hisahide Takahashi and Bruce J. Holub* 1183
The Combined Effects of Dietary Fat and Estrogen on Survival, 7,12-Dimethylbenz(a)anthracene-Induced Breast Cancer and Prolactin Metabolism in Rats. *Steven K. Clinton, P. Shirley Li, Anthony L. Mulloy, Peter B. Imrey, Steven Nandkumar and Willard J. Visek* 1192
Dietary Magnesium Deficiency in Rats Enhances Free Radical Production in Skeletal Muscle. *Edmond Rock, Catherine Astier, Claudine Lab, Xavier Vignon, Elyett Gueux, Claude Motta and Yves Rayssiguier* 1205

Community and International Nutrition

Dietary Vitamin A Intake and the Incidence of Diarrhea and Respiratory Infection among Sudanese Children. *Wafaie W. Fawzi, M. Guillermo Herrera, Walter C. Willett, Penelope Nestel, Alawia El Amin and Kamal A. Mohamed* 1211
Length Screens Better than Weight in Stunted Populations. *Marie T. Ruel, Juan Rivera and Jean-Pierre Habicht* 1222

Human and Clinical Nutrition

Nutrients, Body Composition and Exercise Are Related to Change in Bone Mineral Density in Premenopausal Women. *Linda B. Houtkooper, Cheryl Ritenbaugh, Mikel Aickin, Timothy G. Lohman, Scott B. Going, Judith L. Weber, Kathryn A. Greaves, Thomas W. Boyden, Richard W. Pamenter and Matt C. Hall* 1229
^{15}N-Labeled Immunoglobulins from Bovine Colostrum Are Partially Resistant to Digestion in Human Intestine. *N. Roos, S. Mahé, R. Benamouzig, H. Sick, J. Rautureau and D. Tomé* 1238

Nutrient Metabolism

Simultaneous Measurement of One-Carbon and Polyglutamate Derivatives of Folic Acid in Rat Liver Using Enzymatic Interconversions of Folates Followed by Ternary Complex Formation with Thymidylate Synthetase and 5-Fluorodeoxyuridylic Acid: Standardization of the Method. *G. Franklin Carl and Mary L. Smith* 1245
Characterization of the Japanese Quail Oocyte Receptor for Very Low Density Lipoprotein and Vitellogenin. *Robert G. Elkin, Ian MacLachlan, Marcela Hermann and Wolfgang J. Schneider* 1258
Dietary Intake of the Short-Chain Triglyceride Triacetin vs. Long-Chain Triglycerides Decreases Adipocyte Diameter and Fat Deposition in Rats. *Jamie W. Lynch and James W. Bailey* 1267
Zinc Absorption Estimated by Fecal Monitoring of Zinc Stable Isotopes Validated by Comparison with Whole-Body Retention of Zinc Radiosotopes in Humans. *Ellen Knudsen, Mikael Jensen, Per Solgaard, Sven S. Sørensen and Brittmarie Sandström* 1274
Rat Serum Osteocalcin Concentration Is Decreased by Restriction of Energy Intake. *Biram Ndiaye, Giulia Cournot, Marie-Agnès Pélissier, Odile Walrant Debray and Daniel Lemonnier* 1283
Reduction of Fe(III) Is Required for Uptake of Nonheme Iron by Caco-2 Cells. *Okhee Han, Mark L. Failla, A. David Hill, Eugene R. Morris and J. Cecil Smith, Jr.* 1291
A Na^+-Dependent Mechanism Is Involved in Mucosal Uptake of Cinnamic Acid across the Jejunal Brush Border in Rats. *Siegfried Wolffram, Thomas Weber, Beat Grenacher and Erwin Scharrer* 1300
Protein Synthesis Is Stimulated in Nutritionally Obese Rats. *Ernesto Estornell, José Cabo and Teresa Barber* 1309
Human Growth Hormone but Not Human Insulin-Like Growth Factor-I Enhances Recovery from Neonatal Malnutrition in Rats. *Xiaohui Zhao, Terry G. Unterman and Sharon M. Donovan* 1316

Nutrient Requirements and Interactions

Dietary Calcium Levels and Treatment Interval Determine the Effects of Lead Ingestion on Plasma 1,25-Dihydroxyvitamin D Concentration in Chicks. *Curtis F. Fullmer* 1328
Increasing Phosphorus Intake Reduces Urinary Concentrations of Magnesium and Calcium in Adult Ovariectomized Cats Fed Purified Diets. *F. J. H. Pastoor, A. Th. Van 'T Klooster, J. N. J. J. Mathot and A. C. Beynen* 1334
Age at Sexual Maturity Influences the Response of Single Comb White Leghorn Pullets to Marginal and Low Levels of Dietary Phosphorus. *Shivaram K. Rao, David A. Roland, Sr., Joseph I. Orban, Henry W. Rabon, Jr. and Mary M. Bryant* 1342
Assessing Adequacy of Cholecalciferol Supplementation in Chicks Using Plasma Cholecalciferol Metabolite Concentrations as an Indicator. *Jesse P. Goff and Ronald L. Horst* 1351

ISSUES AND OPINIONS IN NUTRITION

Requirements for What? Is the Measurement of Energy Expenditure a Sufficient Estimate of Energy Needs? *Alok Bhargava and Peter J. Reeds* 1358

LETTERS TO THE EDITOR

Protein Quality of Enteral Nutritionals. *Vernon R. Young* 1363
Protein Quality of Enteral Nutritionals: A Response to Young. *G. Sarwar and R. W. Peace* 1365
Maintenance Requirements for Amino Acids by Rats. *Kyu-Il Kim* 1367
A Reply to Kim. *N. J. Benevenga* 1368

BOOK REVIEW

Protein and Energy: A Study of Changing Ideas in Nutrition. Kenneth J. Carpenter. *Reviewed by Leslie M. Klevay* 1369

SUPPLEMENT

Assessment of Folate Methodology Used in the Third National Health and Nutrition Examination Survey (NHANES III, 1988–1994). *Daniel J. Raiten and Kenneth D. Fisher, editors* 1371S

Announcements 1399

CRITICAL REVIEW

Dietary Modulation of the Human Colonic Microbiota: Introducing the Concept of Prebiotics. *Glenn R. Gibson and Marcel B. Roberfroid* 1401

ARTICLES

Biochemical and Molecular Roles of Nutrients

Dietary Nucleotides Accelerate Intestinal Recovery after Food Deprivation in Old Rats. *María A. Ortega, María C. Nunēz, Angel Gil and Antonio Sánchez-Pozo* 1413
Deficiency of Vitamin E and Selenium Enhances Calcium-Independent Phospholipase A_2 Activity in Rat Lung and Liver. *Chia-Feng Kuo, Shun Cheng and John R. Burgess* 1419
Amylopectin Starch Promotes the Development of Insulin Resistance in Rats. *Suzzanne E. Byrnes, Janette C. Brand Miller and Gareth S. Denyer* 1430
Glutathione Peroxidase and Phospholipid Hydroperoxide Glutathione Peroxidase Are Differentially Regulated in Rats by Dietary Selenium. *Xin Gen Lei, Jacqueline K. Evenson, Kevin M. Thompson and Roger A. Sunde* 1438
Copper Deficiency Alters Rat Peptidylglycine α-Amidating Monooxygenase Activity. *Joseph R. Prohaska, William R. Bailey and Patricia M. Lear* 1447
Large Supplements of Nicotinic Acid and Nicotinamide Increase Tissue NAD^+ and Poly(ADP-Ribose) Levels but Do Not Affect Diethylnitrosamine-Induced Altered Hepatic Foci in Fischer-344 Rats. *Tammy M. Jackson, Jean M. Rawling, Bill D. Roebuck and James B. Kirkland* 1455
Protein-Deficient Pigs Cannot Maintain Reduced Glutathione Homeostasis When Subjected to the Stress of Inflammation. *Farook Jahoor, Linda J. Wykes, Peter J. Reeds, Joseph F. Henry, Melanie P. Del Rosario and Margaret E. Frazer* 1462

Community and International Nutrition

A Brief, Telephone-Administered Food Frequency Questionnaire Can Be Useful for Surveillance of Dietary Fat Intakes. *Ralph J. Coates, Mary K. Serdula, Tim Byers, Ali Mokdad, Sandy Jewell, Sandra B. Leonard, Cheryl Ritenbaugh, Polly Newcomb, Julie Mares-Perlman, Noel Chavez and Gladys Block* 1473

Human and Clinical Nutrition

Administration of Phosphatidylcholine Increases Brain Acetylcholine Concentration and Improves Memory in Mice with Dementia. *Shu-Ying Chung, Tomoe Moriyama, Eiko Uezu, Kayoko Uezu, Rieko Hirata, Noriko Yohena, Yasunobu Masuda, Toyohiko Kokubu and Shigeru Yamamoto* 1484
Primary Chylomicronemia in Patients with Severe Familial Hypertriglyceridemia Responds to Long-Term Treatment with (n-3) Fatty Acids. *Volkhard Pschierer, Werner O. Richter and Peter Schwandt* 1490
In Vivo Methylation Capacity Is Not Impaired in Healthy Men during Short-Term Dietary Folate and Methyl Group Restriction. *Robert A. Jacob, Frederick S. Pianalto, Susanne M. Henning, Jian Z. Zhang and Marian E. Swendseid* 1495
Sourdough Fermentation or Addition of Organic Acids or Corresponding Salts to Bread Improves Nutritional Properties of Starch in Healthy Humans. *Helena G. M. Liljeberg, Clas H. Lönner and Inger M. E. Björck* 1503

NUTRIENT METABOLISM

Estimation of Rat Body Composition by Means of Electromagnetic Scanning Is Altered by Duration of Anesthesia. *Brian W. Tobin and Diane T. Finegood* 1512
Dietary Fibers Differ in Their Effects on Large Bowel Epithelial Proliferation and Fecal Fermentation-Dependent Events in Rats. *Marisa Folino, Ann McIntyre and Graeme P. Young* 1521
Brain Iron, Transferrin and Ferritin Concentrations Are Altered in Developing Iron-Deficient Rats. *Qing Chen, James R. Connor and John L. Beard* 1529
Corn Oil, Palm Oil and Butterfat Fractions Affect Postprandial Lipemia and Lipoprotein Lipase in Meal-Fed Rats. *Hui-Chuan Lai and Denise M. Ney* 1536
Muscle Respiration in Rats Is Influenced by the Type and Level of Dietary Fat. *Richard J. Early and Steven P. Spielman* 1546
Inhibition of Starch Digestion by α-Amylase Inhibitor Reduces the Efficiency of Utilization of Dietary Proteins and Lipids and Retards the Growth of Rats. *Arpad Pusztai, George Grant, Tracey Duguid, David S. Brown, Willy J. Peumans, Els J. M. Van Damme and Susan Bardocz* 1554

Petroselinic Acid from Dietary Triacylglycerols Reduces the Concentration of Arachidonic Acid in Tissue Lipids of Rats. *Nikolaus Weber, Klaus-Dieter Richter, Erhard Schulte and Kumar D. Mukherjee* ... 1563
Comparative Absorption and Transport of Five Common Carotenoids in Preruminant Calves. *Tiffany L. Bierer, Neal R. Merchen and John W. Erdman, Jr.* ... 1569

Nutrient Requirements and Interactions

Polynucleotides Compensate for Impaired T-Dependent Antibody Production Induced in C57Bl/6 Mice by a Nucleotide-Free Diet Both In Vivo and In Vitro, but a Mononucleotide-Nucleoside Mixture Is Effective Only In Vivo. *Harumi Jyonouchi, Sinning Sun, Lei Zhang-Shanbhag and Hiroomi Yokoyama* 1578
Methionine Overcomes Neural Tube Defects in Rat Embryos Cultured on Sera from Laminin-Immunized Monkeys. *Benedict J. Chambers, Norman W. Klein, Philip G. Nosel, Lamia H. Khairallah and James S. Romanow* ... 1587
Aging and Food Restriction Alter Some Indices of Bone Metabolism in Male Rhesus Monkeys (*Macaca mulatta*). *Mark A. Lane, Abraham Z. Reznick, Edward M. Tilmont, A. Lanir, Sheldon S. Ball, Virginia Read, Donald K. Ingram, Richard G. Cutler and George S. Roth* ... 1600
The Validity of Extrinsic Stable Isotopic Labeling for Mineral Absorption Studies in Rats. *Julio J. Boza, Thomas E. Fox, John Eagles, Peter D. G. Wilson and Susan J. Fairweather-Tait* ... 1611
Maternal Dietary Carbohydrate Restriction and Mild-to-Moderate Exercise during Pregnancy Modify Aspects of Fetal Development in Rats. *Mona Cobrin and Kristine G. Koski* ... 1617

Invitation for Nominations for 1996 ... 1628
Announcements ... 1631

No. 6S JUNE 1995

1994 AIN SYMPOSIUM PROCEEDINGS

Symposium: Role of Nutrition in Lung Development and Function

Introduction. *Robert J. Roberts* ... 1633S
Role of Vitamin A in Lung Development. *Richard D. Zachman* ... 1634S
The Developing Rat Lung Fibroblast and Alveolar Type II Cell Actively Recruit Surfactant Phospholipid Substrate. *Jeanne S. Nunez and John S. Torday* ... 1639S
Role of Fatty Acids in Lung Development. *Rose M. Viscardi* ... 1645S
Do Polyunsaturated Fatty Acids Protect Against Oxidant-Induced Lung Damage? *Ilene R. S. Sosenko* 1652S
Effect of Diet of Lung Structure, Connective Tissue Metabolism and Gene Expression. *David J. Riley and Smita Thakker-Varia* ... 1657S

Symposium: Nutritional Modulation of Lipid-Mediated Signal Transduction Systems

Oxidatively Fragmented Phospholipids as Inflammatory Mediators: The Dark Side of Polyunsaturated Lipids. *Guy A. Zimmerman, Stephen M. Prescott and Thomas M. McIntyre* ... 1661S
Suppression of Mevalonate Pathway Activities by Dietary Isoprenoids: Protective Roles in Cancer and Cardiovascular Disease. *Charles E. Elson* ... 1666S
Dietary Modulation of Epidermal Protein Kinase C: Mediation by Diacylglycerol. *Diane F. Birt* ... 1673S
Role of Dietary Sphingolipids and Inhibitors of Sphingolipid Metabolism in Cancer and Other Dieases. *Alfred H. Merrill, Jr., Eva-Maria Schmelz, Elaine Wang, Joseph J. Schroeder, Dirck L. Dillehay and Ronald T. Riley* ... 1677S
Modulation of Signal Transduction in Macrophages by Dietary Fatty Acids. *Kent L. Erickson, Neil E. Hubbard and Rabindranath Chakrabarti* ... 1683S

Symposium: Pleiotropic Actions of Vitamin D

Pleiotropic Actions of 1α,25-Dihydroxyvitamin D_3: An Overview. *Anthony W. Norman* 1687S
Genomic Actions of 1,25-dihydroxyvitamin D_3. *G. Kerr Whitfield, Jui-Cheng Hsieh, Peter W. Jurutka, Sanford H. Selznick, Carol A. Haussler, Paul N. MacDonald and Mark R. Haussler* 1690S
Nongenomic Effects of 1,25-Dihydroxyvitamin D_3: Potential Relation of a Plasmalemmal Receptor to the Acute Enhancement of Intestinal Calcium Transport in Chick. *Ilka Nemere* 1695S
Vitamin D Metabolites Modulate Osteoblast Activity by Ca^{+2} Influx-Independent Genomic and Ca^{+2} Influx-Dependent Nongenomic Pathways. *Ramzi S. Khoury, Jean Weber and Mary C. Farach-Carson* 1699S
Immunosuppressive Actions of 1,25-Dihydroxyvitamin D_3: Preferential Inhibition of Th_1 Functions. *Jacques M. Lemire, D. Clay Archer, Lucinda Beck, and Hans L. Spiegelberg* 1704S
$1,25(OH)_2D_3$-Regulated Human Keratinocyte Proliferation and Differentiation: Basic Studies and Their Clinical Application. *Daniel D. Bikle* 1709S

Symposium: Insulin Resistance, Obesity and Hypertension

Insulin Resistance, Obesity and Hypertension: An Overview. *Michael B. Zemel* 1715S
Insulin Resistance, Obesity and Hypertension. *Albert P. Rocchini* 1718S
Obesity and Hypertension: Roles of Hyperinsulinemia, Sympathetic Nervous System and Intrarenal Mechanisms. *Michael W. Brands, John E. Hall, Bruce N. Van Vliet, Magdalena Alonso-Galicia, Guillermo A. Herrera and Dion Zappe* 1725S
Insulin Inhibits Dog Vascular Smooth Muscle Contraction and Lowers $Ca^{2+}{}_i$ by Inhibiting Ca^{2+} Influx. *Andrew M. Kahn and Tom Song* 1732S
Insulin Resistance vs. Hyperinsulinemia in Hypertension: Insulin Regulation of Ca^{2+} Transport and Ca^{2+}-Regulation of Insulin Sensitivity. *Michael B. Zemel* 1738S

Symposium: Alpha-Keto Acid Dehydrogenase Complexes: Nutrient Control, Gene Regulation and Genetic Defects

Overview. *Mulchand S. Patel and Robert A. Harris* 1744S
The Pyruvate Dehydrogenase Complex: Nutrient Control and the Pathogenesis of Insulin Resistance. *Mary C. Sugden, Karen A. Orfali and Mark J. Holness* 1746S
Gene Regulation and Genetic Defects in the Pyruvate Dehydrogenase Complex. *Mulchand S. Patel, Sharon Naik, Isaiah D. Wexler and Douglas S. Kerr* 1753S
Nutritional Regulation of the Protein Kinases Responsible for the Phosphorylation of the α-Ketoacid Dehydrogenase Complexes. *Robert A. Harris, Kirill M. Popov and Yu Zhao* 1758S
Branched-Chain α-Keto Acid Dehydrogenase Complex in Rat Skeletal Muscle: Regulation of the Activity and Gene Expression by Nutrition and Physical Exercise. *Yoshiharu Shimomura, Hisao Fujii, Masashige Suzuki, Taro Murakami, Noriaki Fujitsuka and Naoya Nakai* 1762S
Molecular Basis of Maple Syrup Urine Disease and Stable Correction by Retroviral Gene Transfer. *David T. Chuang, James R. Davie, R. Max Wynn, Jacinta L. Chuang, Hirohisa Koyata and Rody P. Cox* ... 1766S

Conference: Metabolic Modifiers

Thyroid Hormones, Their Activation, Degradation and Effects on Metabolism. *F. M. Anne McNabb* .. 1773S
Species Variation in Mechanisms for Modulation of Growth by Beta-Adrenergic Receptors. *Harry J. Mersmann* 1777S
Proposed Mechanisms for the Regulation of Growth Hormone Action in Poultry: Metabolic Effects. *Regina Vasilatos-Younken* 1783S

Conference: Beyond Deficiency: New Views of Vitamins in Ruminant Nutrition and Health

Beyond Deficiency: New Views of Vitamins in Ruminant Nutrition and Health: An Overview. *Richard A. Roeder* 1790S
Supranutritional Administration of Vitamins E and C Improves Oxidative Stability of Beef. *Daniel M. Schaefer, Qingping Liu, Cameron Faustman and Mei-Chin Yin* 1792S

Bioavailability and Interaction of Vitamin A and Vitamin E in Ruminants. *Gerald T. Schelling, Richard A. Roeder, Mikel J. Garber and Walter M. Pumfrey* 1799S
Antioxidant Vitamins Affect Food Animal Immunity and Health. *Boon P. Chew* 1804S

Biochemical and Molecular Roles of Nutrients

Unsaturated Fatty Acids Regulate Gene Expression of Cellular Retinol-Binding Protein, Type II in Rat Jejunum. *Kazuhito Suruga, Rie Suzuki, Toshinao Goda and Sachiko Takase* 2039
Animal and Plant Fats Selectively Modulate Oxidizability of Rabbit LDL and LDL-Mediated Disruption of Endothelial Barrier Function. *Bernhard Hennig, Michal Toborek, Gilbert A. Boissonneault, N. C. Shantha, Eric A. Decker and Peter R. Oeltgen* 2045
LDL Receptor Activity Is Down-Regulated Similarly by a Cholesterol-Containing Diet High in Palmitic Acid or High in Lauric and Myristic Acids in Cynomolgus Monkeys. *Arthur F. Stucchi, Antonius H. M. Terpstra and Robert J. Nicolosi* 2055
Retinoic Acid Repletion Restores the Number of Leukocytes and Their Subsets and Stimulates Natural Cytotoxicity in Vitamin A-Deficient Rats. *Zirong Zhao and A. Catharine Ross* 2064
Consumption of Excess Vitamin A, but Not Excess β-Carotene, Causes Accumulation of Retinol That Exceeds the Binding Capacity of Cellular Retinol-Binding Protein, Type II and Rat Intestine. *Rie Suzuki, Toshinao Goda and Sachiko Takase* 2074
Zinc Deficiency Decreases the Concentration of *N*-Methyl-D-Aspartate Receptors in Guinea Pig Cortical Synaptic Membranes. *Jimmy D. Browning and Boyd L. O'Dell* 2083
Deprivation of Dietary Nucleotides Results in a Transient Decrease in Acid-Soluble Nucleotides and RNA Concentration in Rat Liver. *Ana T. López-Navarro, Angel Gil and Antonio Sánchez-Pozo* 2090
Rat Liver Subcellular Folate Distribution Shows Association of Formyltetrahydropteroylpentaglutamates with Mitochondria and Methyltetrahydropteroylhexaglutamates with Cytoplasm. *G. Franklin Carl, Farlyn Z. Hudson and Byron S. McGuire, Jr.* 2096
Somatotropin Enhances the Rate of Amino Acid Deposition but Has Minimal Impact on Amino Acid Balance in Growing Pigs. *Thomas J. Caperna, Roger G. Campbell, M. R. Malcom Ballard and Norman C. Steele* 2104

Biotin Influences Palatal Development of Mouse Embryos in Organ Culture. *Toshiaki Watanabe, Krishnamurti Dakshinamurti and Trivedi V. N. Persaud* 2114

Community and International Nutrition

Night Blindness Is Prevalent during Pregnancy and Lactation in Rural Nepal. *Joanne Katz, Subarna K. Khatry, Keith P. West, Jean H. Humphrey, Steven C. Leclerq, Elizabeth Kimbrough Pradhan, R. P. Pohkrel and Alfred Sommer* 2122

Human and Clinical Nutrition

All-*trans* β-Carotene Preferentially Accumulates in Human Chylomicrons and Very Low Density Lipoproteins Compared with the 9-*cis* Geometrical Isomer. *Wilhelm Stahl, Wolfgang Schwarz, Jutta von Laar and Helmut Sies* 2128

Nutrient Metabolism

Hypocholesterolemic Action of Eritadenine Is Mediated by a Modification of Hepatic Phospholipid Metabolism in Rats. *Kimio Sugiyama, Toshiyuki Akachi and Akihiro Yamakawa* 2134
The Utilization of Lupin (*Lupinus angustifolius*) and Faba Bean Globulins by Rats Is Poorer than of Soybean Globulins or Lactalbumin but the Nutritional Value of Lupin Seed Meal Is Lower only than That of Lactalbumin. *Luis A. Rubio, George Grant, Piotr W. O. Scislowski, David Brown, Susan Bardocz and Arpad Pusztai* 2145
Absorption of Fructose by Isolated Small Intestine of Rats is Via a Specific Saturable Carrier in the Absence of Glucose and by the Disaccharidase-Related Transport System in the Presence of Glucose. *Kosuke Ushijima, Jacques E. Riby, Takuji Fujisawa and Norman Kretchmer* 2156
Consumption of Carbohydrate or Medium- or Long-Chain Triglycerides by Unfed Rats Exerts Different Protein-Sparing Effects. *Ryozo Takada and Mamoru Saitoh* 2165
The Time Course of Adaptation of Intestinal Nutrient Uptake in Mice Is Independent of Age. *Ronaldo P. Ferraris and Ravi R. Vinnakota* 2172
Chronic Protein Restriction Does Not Alter Energetic Efficiency of Brown Adipose Tissue Thermogenic Capacity in Genetically Obese (*fa/fa*) Zucker Rats. *S. E. Specter, J. S. Hamilton, J. S. Stern, and B. A. Horwitz* 2183
Uptake and Metabolism of Riboflavin-5′-α-D-Glucoside by Rat and Isolated Liver Cells. *Theresa Joseph and Donald B. McCormick* 2194

Nutrient Requirements and Interactions

Dietary Protein Quality Alters Ornithine Decarboxylase Activity but Not Vitamin B-6 Nutritional Status in Rats. *David A. Sampson, Susan C. Harrison, Steven D. Clarke and Xiaolang Yan* 2199

EDITORIAL ANNOUNCEMENT

Editorial Announcement 2285

ARTICLES

Biochemical and Molecular Roles of Nutrients

Marine and Freshwater Fish Oil Varying in Arachidonic, Eicosapentaenoic and Docosahexaenoic Acids Differ in their Effects on Organ Lipids and Fatty Acids in Growing Rats. *Sheila M. Innis, France M. Rioux, Nancy Auestad and Robert G. Ackman* 2286
Cholesterol Consumption Alters Hepatic Sphingomyelin Metabolism in Rats. *Math J. H. Geelen, Lilian B. M. Tijburg, Carolien J. Bouma and Anton C. Beynen* 2294

Human and Clinical Nutrition

Coffee Oil Consumption Does Not Affect Serum Cholesterol in Rhesus and Cebus Monkeys. *A. H. M. Terpstra, M. B. Katan, M. P. M. E. Weusten-Van Der Wouw, R. J. Nicolosi and A. C. Beynen* 2301
Bioavailability of Soybean Isoflavones Depends upon Gut Microflora in Women. *Xia Xu, Keecha S. Harris, Huei-Ju Wang, Patricia A. Murphy and Suzanne Hendrich* 2307
Food Restriction Inhibits an Autoimmune Disease Resembling Systemic Lupus Erythematosus in (NZB × NZW) F1 Mice. *Masahiki Urao, Genjiro Ueda, Masaaki Abe, Kimiyoshi Kanno, Sachiko Hirose and Toshikazu Shirai* 2316
High Levels of Inorganic Sulfate Cause Diarrhea in Neonatal Piglets. *Guillermo G. Gomez, Robert S. Sandler and Elston Seal, Jr.* 2325
Protein Calculation From Food Diaries of Adult Humans Underestimates Values Determined Using a Biological Marker. *Linda G. Snetselaar, Catherine A. Chenard, Lawrence G. Hunsicker and Phyllis J. Stumbo* 2333
Starch and Dietary Fiber Components Are Excreted and Degraded to Variable Extents in Ileostomy Subjects Consuming Mixed Diets with Wheat- or Oat-Bran Bread. *Per Åman, Dan Pettersson, Jie-Xian Zhang, Per Tidehag and Göran Hallmans* 2341

Nutrient Metabolism

Calcium Solubility, Intestinal Sojourn Time and Paracellular Permeability Codetermine Passive Calcium Absorption in Rats. *Catherine Duflos, Claire Bellaton, Danielle Pansu and Felix Bronner* 2348
Diet-Induced Obesity in Mice Can Be Treated without Energy Restriction Using Exercise And/Or a Low-Fat Diet. *Roma R. Bell, Michelle J. Spencer and Jillian L. Sherriff* 2356
Serum Triiodothyronine Concentration and Na^+,K^+-ATPase Activity in Liver and Skeletal Muscle Are Influenced by Dietary Fat Type in Rats. *Hiroyuki Takeuchi, Tatsuhiro Matsuo, Kumpei Tokuyama and Masashige Suzuki* 2364
Tissue B-6 Vitamer Concentrations in Rats Fed Excess Vitamin B-6. *Monica C. Schaeffer, Denise Gretz, J. Dennis Mahuren and Stephen P. Coburn* 2370
Positional Distribution of Stearic Acid and Oleic Acid in a Triacylglycerol and Dietary Calcium Concentration Determines the Apparent Absorption of these Fatty Acids in Rats. *Elizabeth J. Brink, Edward Haddeman, Nanneke J. de Fouw and Jan A. Weststrate* 2379
The Induction of Citrulline Synthesis from Glutamine in Enterocytes of Weaned Pigs Is Not Due Primarily to Age or Change in Diet. *Michael E. R. Dugan, Darrell A. Knabe and Guoyao Wu* 2388
Replacing *Cis* Octadecenoic Acid with *Trans* Isomers in Media Containing Rat Adipocytes Stimulates Lipolysis and Inhibits Glucose Utilization. *Kimberly D. Cromer, Thomas C. Jenkins and Evanne J. Thies* 2394

Nutrient Requirements and Interactions

Pre- and Postweaning Food Restrictions Interact to Determine Reproductive Success and Milk Volume in Rats. *Michelle K. McGuire, Andrea W. Littleton, Kerry J. Schulze and Kathleen M. Rasmussen* .. 2400
1α-Hydroxylated Cholecalciferol Compounds Act Additively with Microbial Phytase to Improve Phosphorus, Zinc and Manganese Utilization in Chicks Fed Soy-Based Diets. *Robert R. Biehl, David H. Baker and Hector F. DeLuca* 2407
Calcium and Magnesium Absorption from the Colon and Rectum Are Increased in Rats Fed Fructooligosaccharides. *Atsutane Ohta, Masako Ohtsuki, Seigo Baba, Takashi Adachi, Takashi Sakata and El Sakaguchi* 2417
Rat Plasma VLDL Composition and Concentration and Hepatic Lipase and Lipoprotein Lipase Activities Are Impaired during Two Types of Protein Malnutrition and Unaffected by Balanced Refeeding. *Myriem Y. Lamri, Malika Meghelli-Bouchenak, Ahmed Boualga, Jacques Belleville and Josiane Prost* 2425

Proceedings of the Fifty-Ninth Annual Meeting of the American Institute of Nutrition 2435
Announcements 2448

No. 10 OCTOBER 1995

Biochemical and Molecular Roles of Nutrients

Dietary Medium-Chain Fatty Acids Raise and (n-3) Polyunsaturated Fatty Acids Lower Hepatic Triacylglycerol Synthesis in Rats. *Math J. H. Geelen, Willy J. Schoots, Caspaar Bijleveld and Anton C. Beynen* 2449
Starvation and Refeeding Regulate Glycogen Synthase Gene Expression in Rat Liver at the Posttranscriptional Level. *Talia Nur, Ilan Sela, Nicholas J. G. Webster and Zecharia Madar* 2457
Rat Cecal Inocula Produce Different Patterns of Short-Chain Fatty Acids than Fecal Inocula in In Vitro Fermentations. *David J. Monsma and Judith A. Marlett* 2463
The $CD45Ra^+$ (Quiescent) Cellular Phenotype Is Overabundant Relative to the $CD45RA^-$ Phenotype within the Involuted Splenic T Cell Population of Weanling Mice Subjected to Wasting Protein-Energy Malnutrition. *Bill D. Woodward, Kevin D. Bezanson, Lyn M. Hillyer and Wen-Hui Lee* 2471
Astaxanthin, a Carotenoid without Vitamin A Activity, Augments Antibody Responses in Cultures Including T-helper Cell Clones and Suboptimal Doses of Antigen. *Harumi Jyonouchi, Sining Sun, Yoshifumi Tomita and Myron D. Gross* 2483
Long-Term Supplementation of Canthaxanthin Does Not Inhibit Gastric Epithelial Cell Proliferation in *Helicobacter mustelae*-Infected Ferrets. *Jing Yu, James G. Fox, Michael C. Blanco, Lili Yan, Pelayo Correa and Robert M. Russell* 2493

Community and International Nutrition

Arctic Indigenous Women Consume Greater Than Acceptable Levels of Organochlorines. *H. V. Kuhnlein, O. Receveur, D. C. G. Muir, H. M. Chan and R. Soueida* 2501

Human and Clinical Nutrition

Vitamin B-12 Status of Long-Term Adherents of a Strict Uncooked Vegan Diet ("Living Food Diet") Is Compromised. *Anna-Liisa Rauma, Riitta Törrönen, Osmo Hänninen and Hannu Mykkänen* 2511
Estimates of the Effect of Feeding on Whole-Body Protein Degradation in Women Vary with the Amino Acid Used as Tracer. *Heiner K. Berthold, Farook Jahoor, Peter D. Klein and Peter J. Reeds* 2516
The Arachidonic Acid Content of the Australian Diet Is Lower than Previously Estimated. *Neil J. Mann, Leeann G. Johnson, Glenda E. Warrick and Andrew J. Sinclair* 2528
Lean and Heavy Women May Not Use Energy from Alcohol with Equal Efficiency. *Beverly A. Clevidence, Philip R. Taylor, William S. Campbell and Joseph T. Judd* 2536

Nutrient Metabolism

Carnitine Palmitoyltransferase Modulation of Hepatic Fatty Acid Metabolism and Radio-HPLC Evidence for Low Ketogenesis in Neonatal Pigs. *Jack Odle, Xi Lin, Theo A. T. G. van Kempen, James K. Drackley and Sean H. Adams* 2541
In Vivo Threonine Oxidation Rate Is Dependent on Threonine Dietary Supply in Growing Pigs Fed Low to Adequate Levels. *Nathalie Le Floc'h, Christiane Obled and Bernard Sève* 2550
para-Acetamidobenzoylglutamate Is a Suitable Indicator of Folate Catabolism in Rats. *Francis L. Geoghegan, Joseph M. McPartlin, Donald G. Weir and John M. Scott* 2563
Splanchnic Infusions of Short Chain Fatty Acids Do Not Change Insulin Sensitivity of Pigs. *Michael I. McBurney, Karena V. J. Apps and Diane T. Finegood* 2571
The Transport of Lysine across Monolayers of Human Cultured Intestinal Cells (Caco-2) Depends on Na^+-Dependent and Na^+-Independent Mechanisms on Different Plasma Membrane Domains. *Simonetta Ferruzza, Giulia Ranaldi, Mario De Girolamo and Yula Sambuy* 2577
Pantothenic Acid Uptake and Metabolism by Red Blood Cells of Rats. *Kathleen F. Annous and Won O. Song* 2586
A Diet Producing A Low Diabetes Incidence Modifies Immune Abnormalities in Diabetes-Prone BB Rats. *Catherine J. Field* 2594
Dietary Fructooligosaccharide, Xylooligosaccharide and Gum Arabic Have Variable Effects on Cecal and Colonic Microbiota and Epithelial Cell Proliferation in Mice and Rats. *Michael D. Howard, Dennis T. Gordon, Keith A. Garleb and Monty S. Kerley* 2604
Distributions of Carotenoids and α-Tocopherol among Lipoproteins Do Not Change When Human Plasma Is Incubated In Vitro. *Joelle E. Romanchik, Diane W. Morel and Earl H. Harrison* 2610
Variations of Blood Pressures in Lean Zucker Rats Fed Low or High Fat Diets. *Margaret A. Maher, William J. Banz and Michael B. Zemel* 2618
Methionine Deficiency Decreases Protein Accretion and Synthesis but Not tRNA Acylation in Muscles of Chicks. *David M. Barnes, Christopher C. Calvert and Kirk C. Klasing* 2623

Nutrient Requirements and Interactions

Short-Term Moderate Energy Restriction Does Not Affect Indicators of Oxidative Stress and Genotoxicity in Humans. *Erica J. M. Velthuis-te Wierik, Rick E. W. van Leeuwen, Henk F. J. Hendriks, Hans Verhagen, Steffen Loft, Henrik E. Poulsen and Henk van den Berg* 2631
Fish Oils Lower Rat Plasma and Hepatic, but Not Immune Cell α-Tocopherol Concentration. *David W. Alexander, Susan O. McGuire, Nancy A. Cassity and Kevin L. Fritsche* 2640
Diets Causing Taurine Depletion in Cats Substantially Elevate Postprandial Plasma Cholecystokinin Concentration. *Robert C. Backus, Quinton R. Rogers, Grace L. Rosenquist, John Calam and James G. Morris* 2650
Chronic Intake of a Marginally Low Copper Diet Impairs In Vitro Activities of Lymphocytes and Neutrophils from Male Rats Despite Minimal Impact on Conventional Indicators of Copper Status. *Robin G. Hopkins and Mark L. Failla* 2658

Rats Treated with Somatotropin Select Diets Higher in Protein. *Todd J. Roberts, Michael J. Azain, B. Douglas White and Roy J. Martin* 2669
Calcium Metabolism and Requirements of Chickens Are Affected by Growth. *S. Hurwitz, I. Plavnik, A. Shapiro, E. Wax, H. Talpaz and A. Bar* 2679
Coupling of Zinc Dose to Frequency in a Regularly Recurrent Pattern Shows a Limited Capacity of Excessive Dietary Zinc to Compensate for a Previously Deficient Intake. *Berislav Momčilović* 2687
Moderate Copper Deprivation during Gestation and Lactation Affects Dentate Gyrus and Hippocampal Maturation in Immature Male Rats. *Curtiss D. Hunt and Joseph P. Idso* 2700
Seasonal Vitamin A Depletion in Grazing Horses Is Assessed Better by the Relative Dose Response Test than by Serum Retinol Concentration. *Kathleen M. Greiwe-Crandell, D. S. Kronfeld, L. A. Gay and D. Sklan* 2711
Controlled Dietary Folate Affects Folate Status in Nonpregnant Women. *Carolyn A. O'Keefe, Lynn B. Bailey, Elizabeth A. Thomas, Sarah A. Hofler, Barbara A. Davis, James J. Cerda and Jesse F. Gregory III* 2717

Announcements 2726

No. 11 NOVEMBER 1995

ARTICLES

Biochemical and Molecular Roles of Nutrients

Liver Glucose-6 Phosphatase Activity Is Inhibited by Refeeding in Rats. *Carol Minassian, Nathalie Daniele, Jean-Claude Bordet, Carine Zitoun and Gilles Mithieux* 2727
Dietary Methionine Does Not Reduce Penetrance in *Curly Tail* Mice but Causes a Phenotype-Specific Decrease in Embryonic Growth. *Henny W. M. van Straaten, Henk Blom, Marian C. E. Peeters, Anita M. J. Rousseau, Kathy J. Cole and Mary J. Seller* 2733
Nutritional Modulation of Guinea Pig Skin Hyperproliferation by Essential Fatty Acid Deficiency Is Associated with Selective Down Regulation of Protein Kinase C-β. *Yunhi Cho and Vincent A. Ziboh* 2741
Pyridoxine and Pyridoxine-5′-β-D-Glucoside Exert Different Effects on Tissue B-6 Vitamers but Similar Effects on β-Glucosidase Activity in Rats. *Hideko Nakano and Jesse F. Gregory III* 2751
Geraniol, an Inhibitor of Mevalonate Biosynthesis, Suppresses the Growth of Hepatomas and Melanomas Transplanted to Rats and Mice. *Suzanne G. Yu, Leslie A. Hildebrandt and Charles E. Elson* 2763
Insulin Treatment Affects Brain Protein Synthesis Rate in Streptozotocin-Induced Diabetic Rats. *Kazutoshi Hayase and Hidehiko Yokogoshi* 2768
Combined Growth Hormone (GH) and Insulin-Like Growth Factor-I (IGF-I) Treatment Is More Effective Than GH or IGF-I Alone at Enhancing Recovery from Neonatal Malnutrition in Rats. *Xiaohui Zhao and Sharon M. Donovan* 2773

Community and International Nutrition

Delaying the Introduction of Complementary Food until 6 Months Does Not Affect Appetite or Mother's Report of Food Acceptance of Breast-Fed Infants from 6 to 12 Months in a Low Income, Honduran Population. *Roberta J. Cohen, Leonardo Landa Rivera, Judy Canahuati, Kenneth H. Brown and Kathryn G. Dewey* 2787
Validation of the Radimer/Cornell Measures of Hunger and Food Insecurity. *Anne Kendall, Christine M. Olson and Edward A. Frongillo, Jr.* 2793

Human and Clinical Nutrition

A Meta-Analysis of the Effect of Calcium Intake on Bone Mass in Young and Middle Aged Females and Males. *Desiree C. Welten, Han C. G. Kemper, G. Bertheke Post and Wija A. van Staveren* 2802

Short-term Changes in Calcium but Not Protein Intake Alter the Rate of Bone Resorption in Healthy Subjects as Assessed by Urinary Pyridinium Cross-Link Excretion. *Sue A. Shapses, Simon P. Robins, Eric I. Schwartz and Hasina Chowdhury* 2814
Some Aspects of Neonatal Essential Fatty Acid Status Are Altered by Linoleic Acid Supplementation of Women during Pregnancy. *Monique D. Al, Adriana C. v. Houwelingen, Anita Badart-Smook and Gerard Hornstra* 2822

Nutrient Metabolism

Dietary Soybean Protein Decreases Plasma Taurine in Cats. *Seungwook W. Kim, James G. Morris and Quinton R. Rogers* 2831
Diet-Dependent and Diet-Independent Metabolic Responses Underlie Growth Stasis of Pigs at Weaning. *Barbara A. McCracken, H. Rex Gaskins, Pamela J. Ruwe-Kaiser, Kirk C. Klasing and Dennis E. Jewell* 2838
Methylmalonic Acid Inhibits Respiration in Rat Liver Mitochondria. *Shigeki Toyoshima, Fumio Watanabe, Hisako Saido, Kazutaka Miyatake and Yoshihisa Nakano* 2846
Choline Distribution and Metabolism in Pregnant Rats and Fetuses Are Influenced by the Choline Content of the Maternal Diet. *Sanford C. Garner, Mei-Heng Mar and Steven H. Zeisel* 2851
Developmental Changes of Free Amino Acid Concentrations in Fetal Fluids of Pigs. *Guoyao Wu, Fuller W. Bazer and Wenbin Tou* 2859

Nutrient Requirements and Interactions

Dietary Maltitol Increases Calcium Content and Breaking Force of Femoral Bone in Ovariectomized Rats. *Toshinao Goda, Kazuhito Suruga, Sachiko Takase, Ikuko Ezawa and Norimasa Hosoya* 2869
Zinc Status Specifically Changes Preferences for Carbohydrate and Protein in Rats Selecting from Separate Carbohydrate-, Protein-, and Fat-Containing Diets. *Tia M. Rains and Neil F. Shay* 2874
Cecel Infusion of Nutrients Improves Nutritional Status of Rats. *Elaheh Aghdassi, Nilima Raina and Johane P. Allard* 2880

BOOK REVIEW

A Miracle and a Privilege: Recounting a Half-Century of Surgical Advance. Francis D. Moore. *Reviewed by Paul R. Schloerb* 2887

Announcements 2889

SUPPLEMENT

Executive Summary from the Report: Analysis of Adverse Reactions to Monosodium Glutamate (MSG). *Daniel J. Raiten, John M. Talbot, and Kenneth D. Fishers, editors* 2891S

No. 12 DECEMBER 1995

CRITICAL REVIEW

Recent Advances in Methods of Assessing Dietary Amino Acid Requirements for Adult Humans. *Gordon A. Zello, Linda J. Wykes, Ronald O. Ball, and Paul B. Pencharz* 2907

ARTICLES

Biochemical and Molecular Roles of Nutrients

Characterization of a Novel Protein in Chick Intestine that Exhibits Calcium-Binding Activity and Regulation by Dietary Calcium, Aluminum and Vitamin D. *Michael A. Dunn, Saw Leng Too and Amy S. Ishizaki* 2916
Defects of Copper Deficiency in Rats Are Modified by Dietary Treatments that Affect Glycation. *Jack T. Saari, Ann M. Bode and Gwen M. Dahlen* 2925
Copper Deficiency Increases Hepatic Apolipoprotein A-I Synthesis and Secretion but Does Not Alter Hepatic Total Cellular Apolipoprotein A-I mRNA Abundance in Rats. *Ron C.A.J.M. Hoogeveen, Scott K. Reaves and Kai Y. Lei* 2935
Diet Differentially Regulates Glucokinase and L-type Pyruvate Kinase Gene Expression in Rat Liver. *Nobuko Iritani, Hitomi Fukuda, Kayoko Tada, Akiko Itoh and Tamio Noguchi* 2945
CYP-2E1 Inhibitors Partially Ameliorate the Changes in Hepatic Fatty Acid Composition Induced in Rats by Chronic Administration of Ethanol and a High Fat Diet. *Michio Morimoto, Ronald C. Reitz, Robert J. Morin, Khoa Nguyen, Magnus Ingelman-Sundberg and Samuel W. French* 2953

Community and International Nutrition

Randomized Clinical Trial of Nutritional Supplementation Shows Little Effect on Functional Status among Free-Living Frail Elderly. *Katherine Gray-Donald, Hèléne Payette and Véronique Boutier* 2965
Exclusive Breast-Feeding Duration Is Associated with Attitudinal, Socioeconomic and Biocultural Determinants in Three Latin American Countries. *Rafael Pérez-Escamilla, Chessa Lutter, Ana Maria Segall, Ada Rivera, Sandra Treviño-Siller and Tina Sanghvi* 2972

Human and Clinical Nutrition

Vitamin B-6 Status during Childhood: Tracking from 2 Months to 11 Years of Age. *Kaarina Heiskanen, Markku Kallio, Leena Salmenperä, Martti A. Siimes, Inkeri Ruokonen and Jaakko Perheentupa* 2985
Milk Composition in Women from Five Different Regions of China: The Great Diversity of Milk Fatty Acids. *Ruan Chulei, Liu Xiaofang, Man Hongsheng, Ma Xiulan, Lin Guizheng, Duan Gianhong, Carol A. DeFrancesco and William E. Connor* 2993
Supplemental Nutrition with Ornithine α-Ketoglutarate in Rats with Cancer-Associated Cachexia: Surgical Treatment of the Tumor Improves Efficacy of Nutritional Support. *Thierry Le Bricon, Luc Cynober, Catherine J. Field and Vickie E. Baracos* 2999

Nutrient Metabolism

Alterations of Methionine Fluxes and Incorporation in Intestines of Miniature Pigs Fed a Diet High in Caseinate Are Restricted by Angiotensin-Coverting Enzyme Inhibitor. *Dominique Jourdheuil-Rahmani, Pierre H. Rolland, Dominique Masset, Danielle Garçon and Roger Rahmani* 3011
Whole Body Metabolism Is Not Restricted to D-Sugars because Energy Metabolism of L-Sugars Fits a Computational Model in Rats. *G. Livesey and J. C. Brown* 3020
Formation of Second Messenger Diradylglycerol in Murine Peritoneal Macrophages Is Altered after In Vivo (n-3) Polyunsaturated Fatty Acid Supplementation. *Paola A. Marignani and Rolf J. Sebaldt* 3030
Coconut Oil and Beef Tallow, But Not Tricaprylin, Can Replace Menhaden Oil in the Diet of Red Drum (*Sciaenops ocellatus*) without Adversely Affecting Growth or Fatty Acid Composition. *Steven R. Craig and Delbert M. Gatlin, III* 3041
Pregnancy and Lactation Are Associated with Diminished Concentrations of Choline and Its Metabolites in Rat Liver. *Steven H. Zeisel, Mei-Heng Mar, Zhiwei Zhou and Kerry-Ann Da Costa* 3049

Nutrient Requirements and Interactions

Ascorbate Polyphosphate Is a Bioavailable Vitamin C Source in Juvenile Rainbow Trout: Tissue Saturation and Compartmentalization Model. *Malgorzata Matusiewicz, Konrad Dabrowski, Ludwig Volker and Krzysztof Matusiewicz* 3055

Dietary Polyunsaturated Fatty Acids and Aging Modulate Glutathione-Related Antioxidants in Rat Liver. *Raymond Christon, Rahma Belcadi Haloui and Georges Durand* 3062

Tissue α-Tocopherol Retention in Male Rats Is Compromised by Feeding Diets Containing Oxidized Frying Oil. *Jen-Fang Liu and Ching-Jang Huang* 3071

Simultaneous Dietary Supplementation of Sodium Cholate and Beta-Carotene Markedly Enhances Accumulation of Beta-Carotene in Mice. *Keizo Umegaki, Mari Aoshima, Saishi Hirota, Hiromi Uramoto and Takatoshi Esashi* 3081
